The goal of this project was the expansion of a minimum viable project. The most important features are almost completed. Improvements made and side to side comparison:

Old version	New version	Status
Not mobile compatible	Responsive design	Almost Completed
Issues can be seen in a Kanban table	Issues can be seen in both Kanban and To-do list formats	Completed
Issue ordered by priority	Issue Ordered by deadline then by priority	Completed
User type is assigned at sign-up and is final	User type is assigned automatically, any user can join or create projects	Completed
Issues cannot be assigned but only be taken on by users.	Issues can be assigned and project managers have more options	Completed
Titles assigned to projects are final, the only other option is project deletion.	Projects can have their title changed and project managers can add or remove developers.	Completed
No notifications	Some actions send notifications to users.	Waiting
