Week 12/14 (17 - 23 May)

Week 13/14 (24 - 30 May)

Week 14/14 (31 - 6 June)

3 Log

- 21/03: (1) Added deadlines for issues, only project managers can change deadlines and this is done with the edit menu. By default issues are sorted by their deadline and then by priority. Added a field that is the date of completion of an issue.
- 21/03: (2) Added the CAPTCHA to the register page. The selection of the project does not show its join code but instead its id.
- 27/03: (1) Merged some code, updated the schedule.
- 1/04: (1) Wrote a bit in the Requirements document, project planning section.
- 2/04: (1) Did most of the work for the Dynamic Roles feature and now any user can join or create projects.
Made it such that whenever an issue is modified or selected, at the end of the action the user sees the previous page, this means that if the page name changes it will not affect any functionality.
- 5/04: (2) Implemented part of the To-do list table.
- 9/04: (1) Solved some bugs caused by project Ids. Finished the dynamic roles feature.
- 9/04: (2) Issues can now be displayed in the To-do list table.
- 10/04: (1)(2) Solved some issue with the Todo page.
- 11/04: (1) Did some more work for the Requirements document (flows)
- 13/04: (1) Worked for the Planning document
- 15/04: (1) Worked for the System Design document
- 15/04: (2) Worked on the User Guide document
- 16/04: (2) Worked on the To Do page
- 18/04: (1) Completed the "More functionality for manager"
- 01/05: (2) Worked on the responsive design CSS.
- 02/05: (1) Overhauled the create project feature, added the project details field, all project management features now use the same script file. Done most of the project management page and the most of the Edit Project Fields functionality.
- 04/05: (2) Worked on responsive design CSS, the menu.
- 05/05: (1) Completed functionality for: Edit Project Fields, Add Developer, Remove Developer added a way of displaying errors for all options.
- 08/05: (1) Done a progress report containing all the improvements of this version. In the To do list page issues are now ordered by deadline, place, priority.

- 16/05: (2) Worked on the front-end for the notifications page
- 22/05: (1) Done most of the notifications back-end, notifications are inserted to the database and they are displayed in the notifications page. The following cases trigger notifications: Add developer, Remove developer, Join project, Assign Issue.
- 25/04: (1) Fixed a bug where an issue could be assigned to no-one but still be moved. Polished the notifications page and added the option to clear all notifications.
- 26/05: (1) Worked a bit on the presentation, a project manager may now join his own project and by doing so the user will be able to do any action on the same account for that project, notifications are not send if the target user is the current user.
- 30/05: (1) Worked on the presentation, reviewed and done small improvements the responsive CSS part and solved a bug where the deadline would get deleted.
